Turn Over

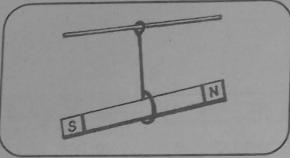

Section A (40 Marks)

- Name the hardest part of a tooth. 1.
- Which force makes some objects to weigh less when put in water?
- Apart from femur, give one other example of a long bone.
- State the best way a school going pupil can avoid contracting HIV. 4.
- Give one way in which water can be used as an energy resource. 5.
- Why are handles of frying pans made of insulators? 6.

The diagram below shows a property of magnets. Use it to answer questions 7

and 8.

2.

- Name the property of magnets shown in the diagram above. 7.
- How does the property named in (7) above simplify the work of a pilots? 8.
- State one role of saliva during digestion of food. 9.
- Apart from water, name one other condition necessary for germination to take 10. place.
- State the energy change that occurs in a dry cell when the circuit is complete. 11.
- How are amphibians similar to fish in terms of reproduction? 12.
- State the main reason why farmers rear Angora goats. 13.
- How is moulting important to an insect? 14.
